SEIZE THE OPPORTUNITY TO FILL THE GAP IN QATAR'S FOOD IMPORTS

The opportunity presenting itself in Qatar's food market is at an all-time high. The time to grab your market share is now! The country's food sector is heavily dependent on imports. Although local production of vegetables, meat, and some crops can cover 80% of the market's needs in some seasons, **Qatar still imports over 90% of its food.**

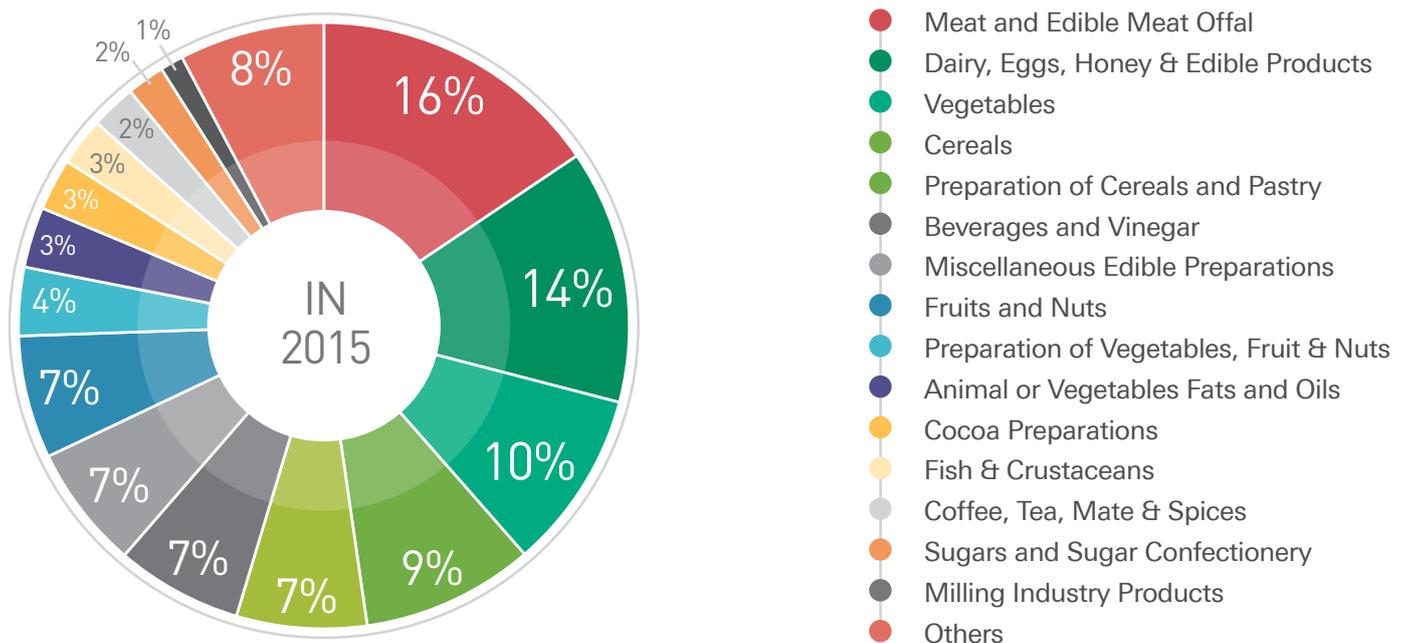

Qatar's steadily growing population, instantaneous rise in food demand, and strong purchasing power spells good fortune for international food producers and vendors looking to fill the gap and capitalize on unmissable business opportunities.

A visible shift of consumption trends to high-value products coupled with a steady increase in tourist arrivals in Qatar year-on-year is also contributing to a higher demand for quality food and catering.

- Qatar imported 1.89 million tons of different agriculture products in 2015
- Qatar imported \$5.87 billion worth of foodstuff in 2015
- Food consumption in Qatar is expected to reach 2.2 million metric tons by 2019
- Food consumption in Qatar is expected to grow at a CAGR of 5.5% between 2014 and 2019
